European School for
Advanced Veterinary Studies

ESAVS Soft Tissue Surgery Course - Laparoscopy 2021 40 hours of intensive training!

Laparoscopy Course in summer: 28 June – 2 July 2021

<https://www.esavs.eu/events/stslaparoscopy21>

or

Laparoscopy Course in autumn: 13 – 17 September 2021

<https://www.esavs.eu/events/stslaparoscopyb21>

Venue:

Center of practical skills and simulation in medicine of University of Medicine and Pharmacy
Cluj-Napca, Romania

Important: Please note, in case of this event being postponed or cancelled due to Covid-19, the ESAVS will either transfer your fee to the new scheduled course or offer a full refund – whichever you prefer.

Course Overview:

The ESAVS Soft Tissue Surgery – Laparoscopy course is dedicated to experienced practitioners, diplomates, residents and faculty members wishing to start with laparoscopic surgery. A strong focus will be made on practical exercises with dry labs on models and ex-vivo organs and wet labs on dogs' cadavers, anesthetized pigs and finally real surgery on dogs.

All procedures on anesthetized animal will respect the most advanced animal welfare guidelines. The dogs will be brought back to where they belong (shelters or owners).

Learning Outcomes:

At the end of the course, participants

- 1) Shall have a profound knowledge on the pros and cons of mini-invasive surgery and the most common indications
- 2) Shall be able to plan and organize a mini-invasive setting in their clinic
- 3) shall be able to perform at least most common elective surgeries.

Program Director/Principal Course Master

Univ. Prof. Dr. Gilles Dupré DECVS (FR/AT)

Co-Course Master

Dr. Bart Van Goethem Dipl.ECVS (AT)

Tuition Fee: 3.600 Euro

Course Schedule

Day 1

History and Recent Developments

The Endoscopic Tower and Basic and advanced Endoscopic Instrumentation

Strategic Organization: Room, Patient, Ports

The Psychomotor Skills and Training in Mini-Invasive Surgery

Capnoperitoneum and Alternatives

Dry Lab: Training in Basic Mini-Invasive Surgery Skills: Tower Construction, Basic Hand-Skills, Basic Mistels Training Tasks 1-2-3

Day 2

How to Enter the Abdomen

Laparoscopic Exploration and Biopsies

Single-Port Devices

The Laparoscopic Spay, The Laparoscopic Cryptorchidectomy, The Laparoscopic Ovariohysterectomy

Ex Vivo Lab: Training in Basic Mini-Invasive Surgery Skills, Liver Biopsies, Ligasure Training, Ligature Training Cholecystectomy, Contest On Cholecystectomy

Day 3

Lap-Ass. and Full Laparoscopic Gastropexy, Lap-Ass. Cystotomy, Lap-Ass. Digestive Surgery

Catheter and Drainage, Cholecystectomy, Adrenalectomy, Nephrectomy and Other

Post-Mortem Lab / Dogs: Laparoscopic Surgery – Exploration, Biopsies, Ove/Ovh,

Cholecystectomy, Optional: Nephrectomy/Adrenalectomy, Lap-Ass. Gastropexy

Day 4

Anesthesia for Laparoscopic Procedures

In Vivo Lab / Pigs: Exploration, Biopsies, Ove/Ovh

In Vivo Lab / Pigs: Cholecystectomy, Adrenalectomy, Nephrectomy

Day 5

Live surgeries Dogs: Laparoscopic Ovariectomy (multiple and single ports)

Minimally-Invasive Surgery Complications (interactive)

14:00 – 15:30 Wrap-Up Session and farewell
