

Job Offer

Veterinary Surgeon

Permanent contract - Paris

Our company

IMMR is a leading facility in preclinical surgical research. Our mission is to make a substantial contribution to medical innovation and human health in the field of implantable medical devices.

IMMR is a team of 50 people. Driven by strong common values, this multidisciplinary team works on a daily basis to guarantee unparalleled technical excellence in preclinical research and impeccable service to French and international customers.

As a Veterinary Surgeon, you will participate in the surgical and anesthetic activity in the OR, in carrying out veterinary care, in the development of our sponsors' studies, and finally in the management of laboratory equipment.

Your missions

VETERINARY ACTIVITY

- You will participate in the surgical and anesthetic activity of the center (anesthesia, surgery, imaging, autopsy ...) by referring to the study protocols, first as an assistant and then as the main operator in the long term,
- As the main operator, you will be the key contact for animal technicians and anesthesiologists during the interventions, as well as for our sponsors,
- On a daily basis, you will carry out all of the pre- and post-operative medical care necessary to ensure the well-being of animals and the smooth running of our studies,
- You will carry out diagnostics and clinical examinations, in collaboration with other veterinarians and the imaging department.

PARTICIPATION IN STUDIES AND SCIENTIFIC PROJECTS

- You will participate in the monitoring of scientific studies with the Study Directors, in direct contact with the sponsors and investigators of the studies (auditors, etc.),
- You will participate in the development of study protocols, CRF and end-of-study reports with the Study Director,
- In and out of the OR, you will guarantee compliance with good laboratory practices and ethical standards for the conduct of preclinical studies,

- Finally, you will participate in the budget management of the studies, by intervening during the invoicing process, in collaboration with our administrative and financial service and the Study Directors.

Required profile

- You have a DVM, with a few years of experience in surgery.
- You have a strong interest for preclinical research in the field of biotechnologies,
- You are ready to invest in an empowering, demanding role, and want to develop a real expertise in cardiac surgery and interventional cardiology.
- Dynamic, pedagogical, you have at heart to learn and to transmit your know-how in a clear and effective way.
- Good leadership, and willingness to lead teams in a benevolent and constructive spirit.
- You are fluent in French and scientific English (read, spoken and written).

Conditions

- Permanent contract
 - On-the-job training provided in surgery, anesthesia, regulations and ethics
 - Veterinary on-duty at weekends, in rotation with other vets
 - Based in Paris 14th
 - Compensation according to profile and experience, accompanied by advantages (participation bonus, gift vouchers, etc.)
 - Start date: March 2020
- For any request for information or application (CV + cover letter), please contact: Valentine Bouhier, HR Manager: valentine.bouhier@imm.fr
