

Job Offer

Veterinary Surgeon

Permanent contract - Paris

Our company

IMMR is a leading facility in preclinical surgical research. Our mission is to make a substantial contribution to medical innovation and human health in the field of implantable medical devices.

As a multidisciplinary team of 55 people, we strive to reach state-of-the-art technical excellence in preclinical research and deliver optimal service to our French and international customers, all the while being driven by strong ethical values.

As our new Veterinary Surgeon, you will undertake anesthetic and surgical missions in the OR, provide veterinary care to animals and be involved first-hand in our sponsors' studies with the prospect of becoming Study Director once you have completed your initial training.

Your future missions

VETERINARY ACTIVITY

- You will participate in the surgical and anesthetic activity of the center (anesthesia, surgery, imaging, autopsy...) by referring to the study protocols, first as assistant, then as main operator in the long term,
- As main operator, you will be the key contact for our animal/anesthesiology technicians during the interventions, as well as for our sponsors,
- On a daily basis, you will carry out pre- and post-operative medical care to ensure the animals' welfare and the smooth running of our studies,
- You will carry out clinical examinations and diagnostics, in collaboration with other veterinarians and the imagery department.

PARTICIPATION IN STUDIES AND SCIENTIFIC PROJECTS

- You will participate in the follow-up of scientific studies with the Study Directors, in direct contact with the sponsors and investigators of the studies (auditors, etc.),
- You will participate in the writing of study protocols, CRF and end-of-study reports with the Study Director and the teams involved,
- In and out of the OR, you will guarantee compliance with good laboratory practices and ethical standards for the conduct of preclinical studies,

- Finally, you will follow the budget aspect of our studies, by following the invoicing process, in collaboration with our executive assistants and the Study Directors.

Your profile

- DVM with previous experience in surgery.
- Strong interest in preclinical research (Medtech/Biotech oriented),
- You are ready to invest in a demanding and rewarding position, and want to develop an expertise in cardiac surgery and interventional cardiology specifically.
- Dynamic, pedagogical, you are keen on both learning and passing on knowledge in an instructive way.
- Good leadership and team spirit.
- Fluent in French and English (read, spoken and written).

Conditions

- Permanent contract following French labour legislation
 - On-the-job training in surgery, anesthesia, regulations and ethics
 - Job is located in the 14th district of Paris (South)
 - Compensation according to profile and experience + benefits (participation bonus, vouchers, etc.)
 - Start date: ASAP
- To inquire about this offer or send in your application (CV + cover letter), please contact: Valentine Bouhier, HR Manager: valentine.bouhier@imm.fr
