

ANGLESEY LODGE EQUINE HOSPITAL is currently recruiting a diplomate EQUINE SURGEON to join our team. We are a full service EQUINE HOSPITAL, based in the heart of the Irish thoroughbred racing and breeding industry. We are a full service equine practice, with our hospital providing specialist surgical and medical back up, as well as advanced diagnostics, to both our ambulatory team and our countrywide referral colleagues. Our case load is primarily thoroughbred, with a growing sport and leisure horse clientele. We are a busy, well equipped hospital, dealing with all general surgeries including orthopaedic, colic and respiratory. We also have standing laparoscopy and laser transendoscopic facilities. Our advanced diagnostic equipment includes scintigraphy and dynamic endoscopy, with digital radiography and ultrasound as standard.

Our new colleague will primarily be hospital based, where a multidisciplinary focus is aimed at ensuring optimum treatment, patient outcome and client satisfaction. Some cases will be dealt with at the owners premises. Development of skills in all areas of surgery and diagnostics will be encouraged and supported.

The surgical rota is equally shared, with significant backup from experienced nurses, enthusiastic interns and colleagues.

Anglesey Lodge Equine Hospital is an Independent Veterinary Practice .
